

Evaluation Outlook

Professor Dr. Abdul Malik
HEJ Research Institute of Chemistry
University of Karachi

1. Title:

1. Should be clear, concise
2. Should not be over exaggerated
3. Should cover the entire theme of the project, *i. e.*
Phytopharmaceuticals from *Centaurea iberica*.

2. Objective:

The objective of the research should be:

- a. In the field related to the Principal Investigator
- b. Of local interest
- c. Of broad national interest
- d. Be realistic and rational
- e. Supported by recent publications in the related area

3. Methodology:

1. Should be realistic and feasible
2. Should involve facilities which are either already available in the department or their provision has been made in the project
3. As far as possible the use of costly equipment and chemicals should be avoided particularly make endeavors to search for alternate cheaper sources

4. **Finances:**

1. The equipments, which are available in the department should not be included in the project otherwise solid justification should be provided
2. The costs of various items should be rational and supported by quotations
3. The number of fellowships should be at par with scope of the project
4. No provision for other staff allowed but allowances may be claimed
5. The inclusion of Co-Principal Investigator would, only, be allowed with proper justification
6. The purchase of pick-up vans, jeeps, *etc.*, may be allowed in the light of sound justification

5. **References:**

The scientific matter should be supported by an up-to-date literature search and recent references should be included as far as possible
