

11TH EDUCATION CONFERENCE ON EDUCATION & NATIONAL INTEGRATION

JANUARY 04TH AND 05TH 2024

At Dr. Ismail Saad Auditorium, Faculty of Education University of Karachi

A. Preamble:

A Nation is considered to be a community of human beings formed on the basis of a combination of shared features, for example, culture, ethnicity, history, language as well as society. Generally, nations are formed through social construction and are historically contingent. Throughout historical evolution, people feel attached to their kin group and traditions, territorial authorities as well as their homeland. Most importantly, it is the shared values, which define a nation. Nation-building is a process, which brings a collection of population having diverse origins, histories, languages, cultures and religions come together within the boundaries of a sovereign state and agree to a unified constitutional and legal framework, a national public educational system, an integrated national economy, shared values and symbols as equals to strive towards eradicating the divisions and injustices done before to cultivate unity and promote a countrywide and a conscious sense of being proudly Pakistani, committed to the country and ideology as well as open to South East-Asia and the world.

B. This conference is an effort to achieve the following objectives:

- Participate in exploratory and academic debates and leave the conference with some new perspectives and methodology
- Connect and enrich engagement with colleagues and peers
- Leave the conference inspired by the affirmation of our identity, knowledge and strength
- Built and enhance opportunities for partnerships across research, policy and community

C. Opportunity:

The conference on "Education and National Integration" will provide an opportunity to talk about issues and challenges faced by the education sector in promoting literacy in the country. It is like a chain effect schooling starts from month's lap and keeps proceeding till you reach to the higher level of professionalism. It is therefore necessary to share each and every level of education and role of teachers in transmitting education.

D. Conference Theme:

- Education: issues and challenges
- STEM: Education
- Community education
- Economics of education
- Research of education
