

# 10th Education Conference

## EDUCATION FOR NATION BUILDING: ROLE OF TEACHERS

At Arts Auditorium, University of Karachi

### Preamble:

A nation is considered to be a community of human beings formed on the basis of a combination of shared features, for example, culture, ethnicity, history, language as well as society. Generally, nations are formed through social construction and are historically contingent. Throughout historical evolution, people feel attached to their kin group and traditions, territorial authorities as well as their homeland. Most importantly, it is the shared values, which define a nation. Nation-building is the process, which brings a collection of population having diverse origins, histories, languages, cultures and religions come together within the boundaries of a sovereign state and agree to a unified constitutional and legal framework, a national public education system, an integrated national economy, shared values and symbols, as equals, to strive towards eradicating the divisions and injustices done before; to cultivate unity; and promote a countrywide conscious sense of being proudly Pakistani, committed to the country and her ideology as well as open to South-East Asia and the world.

The conference on "Education for Nation Building", will provide an opportunity to talk about issues and challenges faced by the education sector in promoting literacy in the country. It is like a chain effect schooling starts from month's lap and keeps proceeding till you reach to the higher level of professionalism. It is therefore necessary to share each and every level of education and role of teachers in transmitting education.
